

R6536TR

ADVANCED DATA SHEET

DETAILS

Model Name

R6536TR

Model Title

65' Tracked Radial Stacker Conveyor

Category

Conveyors

Type

Radial

Brand

Barford

Description

Barford's heavy-duty R6536TR conveyor is a tracked radial stockpiler, meaning it will swing to create a bank of stockpiles in a circle around the machine. This increases the size of your stockpiles without having to manually move your conveyor, saving time and effort. The R6536TR conveyor offers improved flexibility and movement for easy material relocation. This machine has great stockpiling capacity and allows you to quickly shift between tracking and radial modes for minimal setup on location. Best of all, you won't have to move all your material using a loader. The low feed height allows it to fit under a crusher or screener and directly stockpile your material! Perform your jobs more efficiently with this impressive radial stacker.

PROCESSED MATERIALS

- Brick
- Compost
- Concrete
- Demolition Waste
- Gravel
- Rock
- Sand
- Stone
- Topsoil

RECOMMENDED USE

Best For	Versatile use in stockpiling, particularly when space optimization is needed, as it can create circular stockpiles.
Good For	Projects needing quick transitions between tracking and radial modes, especially in construction and demolition.
Not Built For	Extremely large projects that require higher capacity than 400 tons per hour.
Best Loader	Crusher, screener, large excavator, large loader

KEY SPECIFICATIONS

Ton per hour	400 tph
Stockpile Height	26'10"
Engine Type	Cat 1.7 37kW Stage 5

OTHER SPECIFICATIONS

Transport Size (L x W x H) 39'6" × 7'4" × 8'5"

Engine Power 48 hp

Feed Height 8'4"

Belt Size 65' × 36"

Operating Weight 19,840 lbs

Mobility Full Mobile

Working Size (L x W x H) 59'2" × 7'4" × 8'5"

FEATURES

- Long conveyor belt 65'
- Hydraulic drive slewing wheels
- Crawler tracks at feed hopper
- Rubber lined feed hopper
- Galvanized inner telescopic legs
- Galvanized roller guards
- Hydraulic raise/lower
- Self-powered by Cat engine
