

TR8036

ADVANCED DATA SHEET

DETAILS

Model Name

TR8036

Model Title

80' Tracked Mobile Stacker Conveyor

Category

Conveyors

Type

Tracked

Brand

Barford

Description

The TR8036 is an 80' conveyor with a narrower belt width of 36". This conveyor is a good option for gravel pits, processing sand, stone, or organics, and in particular, may be better suited to fine materials depending on what is feeding it. Due to its size, it is better suited to production yards, rather than a contractor out moving from site to site. Ideal applications include static pits, recycling yards, and small companies with maybe only one operator trying to save time loading material.

PROCESSED MATERIALS

- Concrete
- Demolition Waste
- Rock
- Sand
- Topsoil

RECOMMENDED USE

Best For Versatile material stockpiling in environments like gravel pits

Good For Medium-scale projects with reliable stacking of 400 tons per hour

Not Built For Extremely large stockpiling projects needing more capacity

Best Loader Crusher, screener, large excavator, large loader

KEY SPECIFICATIONS

Weight 29,000 lbs

Ton per hour 400 tph

OTHER SPECIFICATIONS

Transport Size (L x W x H) 39'3" x 7'7" x 8'5"

Engine Power 60 hp

Feed Height 4'7"

Stockpile Height 30'2"

Working Size (L x W x H) 73' x 30'2" x 7'7"

FEATURES

- Tracked conveyor 80ft x 36
- Hydraulic slew hubs
- Hydraulic raise/lower
- Hydraulic head fold
- Galvanized legs & guards
- Remote control movement
- Central greasing
